

## Systems Maintenance Training Courses

The following courses provide maintenance personnel and production operators with the skills and knowledge necessary to carry out maintenance tasks on various industrial systems.

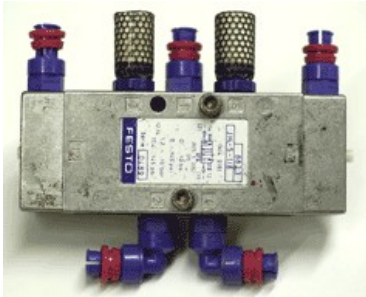

### HYDRAULICS

This course is suitable for anyone who wishes to work on or maintain industrial hydraulic systems. No prior knowledge of hydraulics is necessary.

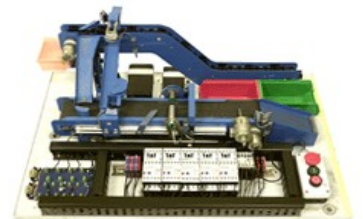

### PNEUMATICS

A practical approach is taken throughout this course with participants gaining valuable 'hands-on' experience on training equipment utilising industry-standard components designed to simulate industrial systems. Comprehensive course notes are provided.

### PROGRAMMABLE LOGIC CONTROLLERS

This course will be invaluable to anyone involved in the maintenance of control systems which incorporate PLCs. Participants should ideally have an understanding of electrical principles.
