

Abrasive Wheels

Provision and Use of Work Equipment Regulations 1998 (PUWER 98) requires, among other things, that all machinery is suitable for its intended use and is properly maintained, and that employees, including those using, mounting and managing the operation of abrasive wheels, are fully informed and properly trained in their safe use.

Who should attend?

This course is suitable for all operators, managers and supervisors who, as part of their working duties select, mount, specify or use abrasive wheels as defined in PUWER Regulations 1998. The aim of the course is to enable delegates to work safely, to provide an understanding of current legislation and promote awareness of the dangers and hazards of abrasive wheels.

Aims and Objectives

The course will enable delegates to ensure that safety issues are managed efficiently, protecting the workforce, other people and the general environment, and will ensure that legal compliance is achieved. Abrasive Wheels are used in many areas and can be highly dangerous if used by untrained personnel.

Course Content and Agenda

Overview of Health and Safety Legislation
Hazards, Risks and Risk Control Measures
Accident Cause & Prevention
Personal Protective Equipment (PPE)
Types of Machines and Abrasive Wheels
Noise Hazards
Prior Use Safety Checks
Mounting of Abrasive Wheels
Course Assessment

Certification

A Certificate of Attendance is awarded to each successful candidate.
