

Electrical & Instrumentation Training Courses

17th Edition IEE Wiring Regulations Course

City & Guilds 2382-10 Industry-standard qualification for all installation electricians. Ideal for all those involved in electrical work of any kind. Three-days plus ½ day exam.

17th Edition IEE Wiring Regulations Update

The City & Guilds 2382-20 update is for candidates who have already achieved the City & Guilds 2381 (16th edition), and need to possess the latest qualification

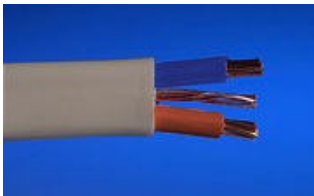

Inspection & Testing of Electrical Installations

Aimed at electrical personnel who either carry out, or supervise, the testing and inspection of installations, the course is designed to meet the needs of those required to sit the City & Guilds 2391-10 examination.

Portable Appliance Testing

This course provides participants with an understanding of the legal requirements and the expertise to carry out the inspection and testing competently.

PLC Maintenance

Programmable logic controllers are commonplace in all areas of industry. This course will be invaluable to anyone involved in the maintenance of control systems which incorporate PLCs.

PLC Programming
